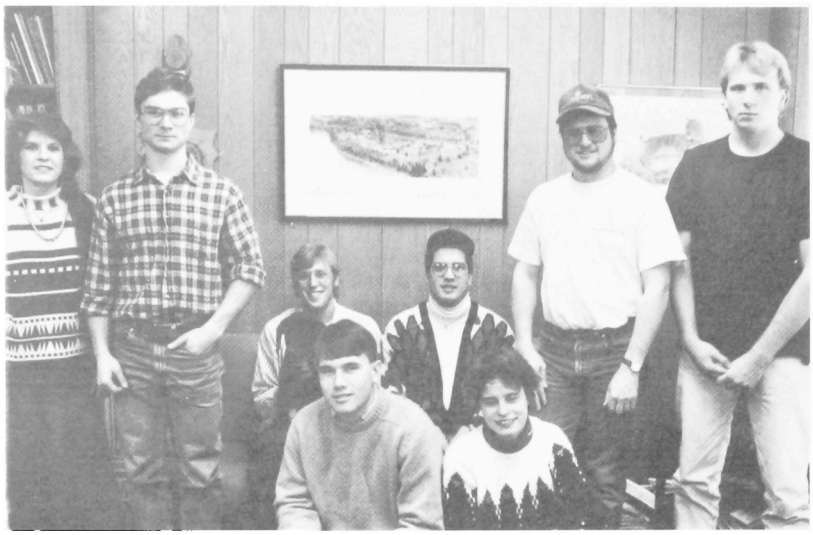
Activities

THE STUDENT ADVISORY COMMITTEE



The student leaders of all the organizations in the College of Forest Resources comprise what is known as the Student Advisory Committee to the Dean. We meet with Dean Wiersma and Assistant Dean Weber every two weeks to discuss issues concerning the students of the College. We plan events such as broomball games, bonfires, fall field day, and the design of new t-shirts and hats for the College which have been quite a hit. We try to keep morale and interest going in the College and are always trying to come up with new ways of getting students (especially first-year students) involved. We strongly encourage all students, new and old, to become involved and to let us know if you have any ideas or concerns.

FOREST PRODUCTS RESEARCH SOCIETY

The Forest Products Research Society was founded in 1947 to provide a forum for all segments of the forest products industry. The society was established to encourage the development and application of new technologies, and provide a link between industry and research.

For the Student Chapter, FPRS provides the opportunity to belong to a professional organization. Benefits include two monthly copies of the ***Forest Products Journal,*** technical newsletters, student newsletters and meetings. The most important benefit is the graduating student directory. This directory provides a list of all graduating student members with a brief biography. According to the Society, this directory is exposed to over 3,000 potential employers.

During the school year FPRS Student Chapter has experienced considerable success. The Student Chapter travelled to Vermont for the New England Kiln Dryers' Association fall meeting. The meeting provided an opportunity to meet industry members, and our attendance served to display the strength of the University of Maines' Wood Technology and Timber Utilization programs.

Chuck Neely
President

Xi Sigma Pi

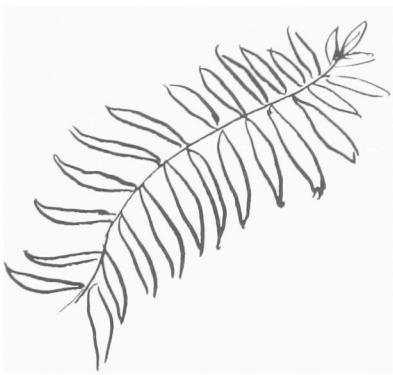
Forestry Honor Society

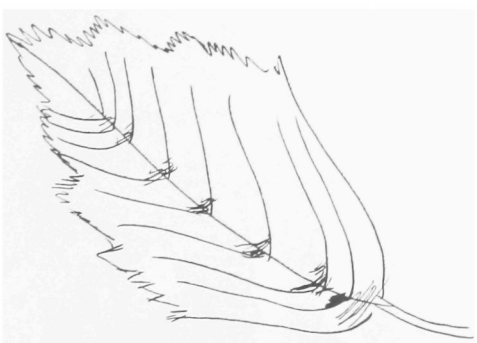
Xi Sigma Pi is a national academic honor society. The Gamma Chapter of the University of Maine College of Forest Resources was founded March 31, 1917. It was the third chapter to be established in the honor society.

All students who are juniors, seniors, or graduate students and have a GPA of 3.0 or higher are invited to join. The students are also expected to be active in the College and promote a high standard of scholarship in forest resources education. Xi Sigma Pi is well recognized and respected in the professions of forest resources. To become a member of this society is a distinguished honor.

Xi Sigma Pi sponsors several activities throughout the year. In order to promote relations between the faculty and students, the society arranges coffee hours each semester in Nutting Hall. Xi Sigma Pi also raises monies for student scholarships with sales from the Annual Christmas Tree Sale. Another festive tradition is the Christmas Party for the College with the Faculty, Staff, and their children. The occasion is always such a success that even Santa Claus never forgets to attend. In the spring, the initiates actively prepare for their initiation processes. The members of Xi Sigma Pi are always greatful for their experiences, and remain devoted leaders in the professions of forest resources.

THE ANNUAL XI SIGMA PI CHRISTMAS TREE SALE





THE WOODSMEN'S TEAM

The Woodsmen's Team was founded on this campus back in 1947 and has been a tradition within the College of Forest Resources ever since. It is through this tradition that the techniques of the early logging days are preserved along with the new. Events such as horizontal and vertical chopping, crosscutting, and log rolling keep alive the old woodsmen's skills. These skills, along with bow sawing, fire building, pole climbing, burling, axe throwing, chain throwing, and pulp tossing, were all part of a "normal" day to the woodsmen of the past. In addition to past skills, the modern woodsmen is also challenged for skill and accuracy with chainsaw events.

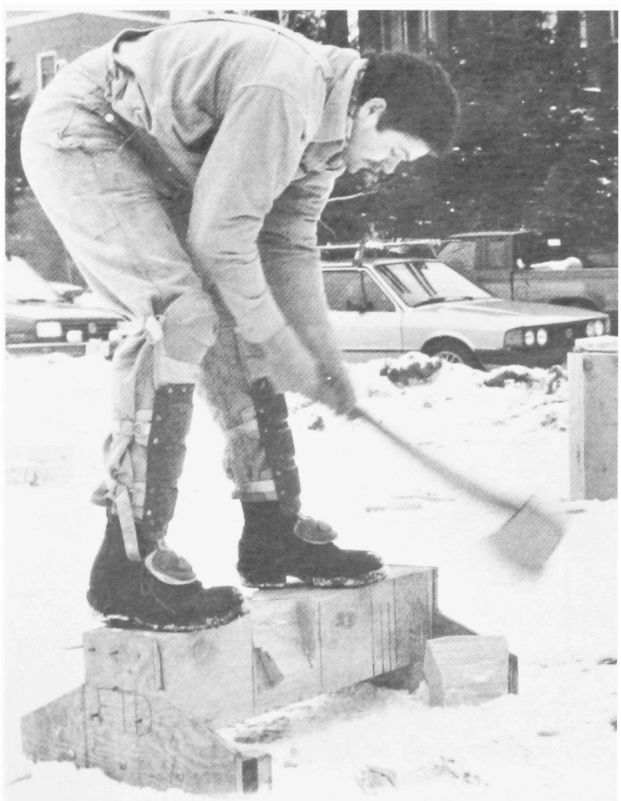
The team consists of six veterans from last year and three new members picked up this year. As usual practices are informal and are held whenever time allows over at Roger F. Taylor Hall, better known as the shed. This year's competitions started off with a meet at Unity College, and from there it was off to Colby's Annual Big Meet. This year Colby's chopping wood was between the range of 12 to 15 inches in diameter with sawing wood at 14 to 20 inches. I can't imagine doing this for a living. In the spring we have two meets in February, the first one at UNH. On February 22 our own Maine Winter Logging Days will be held in the field next to Nutting Hall complete with a pig roast for lunch. Finishing off the year will be the 46th annual Spring Meet to be held at Dartmouth on April 24-25. At least this year we won't have a 14-hour road trip to get there like last year. I know our soggy driver will appreciate that. With Spring Meet over it will be time to finish the year out and to continue the tradition next year.

Dave Landry
Team Captain

The "Woodsmen's Meet"

February 22, 1992

Hosted By The University of Maine Woodsmens Team



SOCIETY OF AMERICAN FORESTERS

"The Mission of the Society of American Foresters is to advance the science, education, technology, and practice of forestry; to enhance the competency of its members; to establish standards of professional excellence; and to use the knowledge, skills, and conservation ethic of the profession to ensure the continued health and use of forest ecosystems and the present and future availability of forest resources to benefit society."

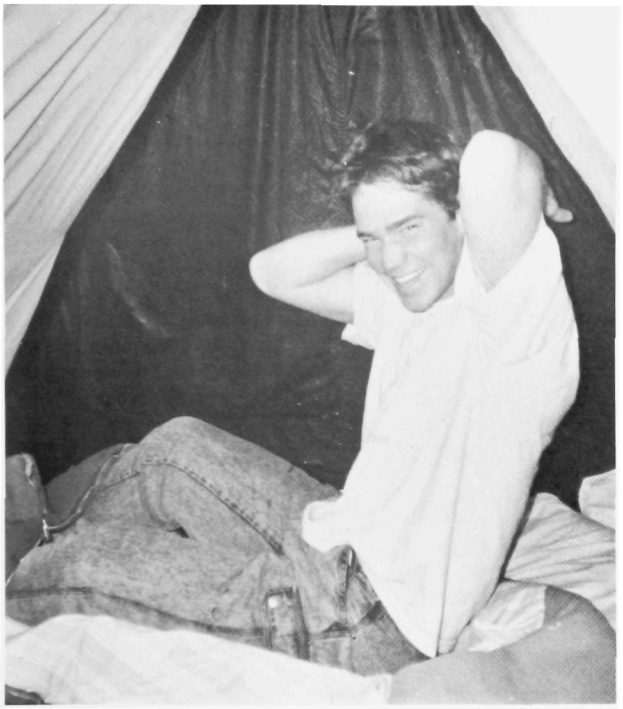
--- Strategic Directions and Priorities, S.A.F.

Over the fall semester of 1991, not many events were undertaken by the student chapter of S.A.F. Two trips were planned. The first to Big Reed Preserve in northern Maine was canceled but a second trip to Acadia National Park was held. The main objective of this trip was to recruit and interest students to join the club, as participation, in the past and present, has been weak. Early in the semester we attended the Common Ground Fair, something the S.A.F. has been actively a part of in the past. It has proven to be an opportunity to test the learning one has undertaken at school, as well as a place to meet people and make contacts.

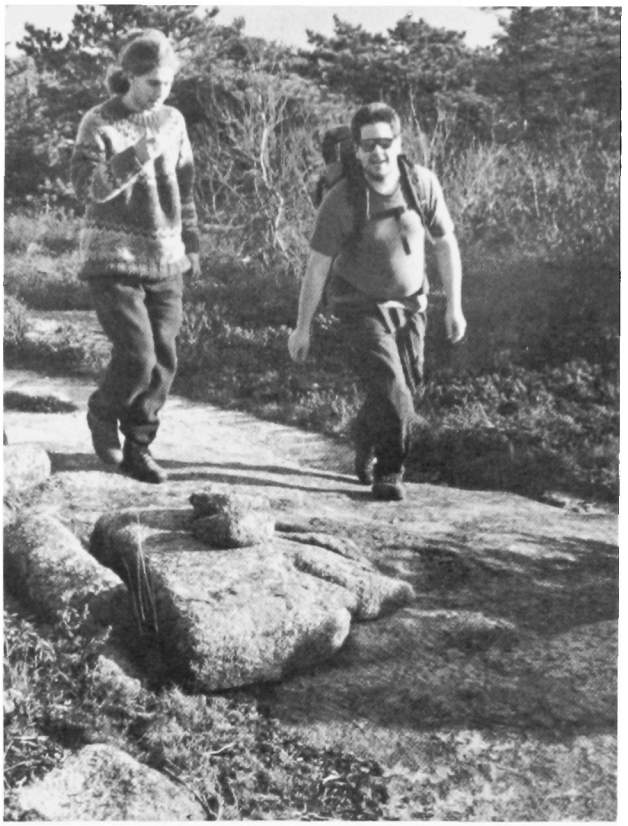
A look at the spring semester appears promising with a variety of trips and events planned including a trip to a Christmas tree farm and a working industrial forest. Also in the brewing may be a trip to a Canadian nursery and someone to speak on hardwood silviculture. As president of S.A.F., my objectives are to use the club as a means for students entering the field of forestry to be exposed to a variety of situations and opportunities in the real world.

Didier-Bonner-Ganter

SOCIETY OF AMERICAN FORESTERS - ACADIA TRIP



"Oh, Hello!"



"High Ho, High Ho and off to the woods we go . . "

"Now guys, this is your handy dandy, bright orange brain protector!"

STUDENT CHAPTER OF THE WILDLIFE SOCIETY

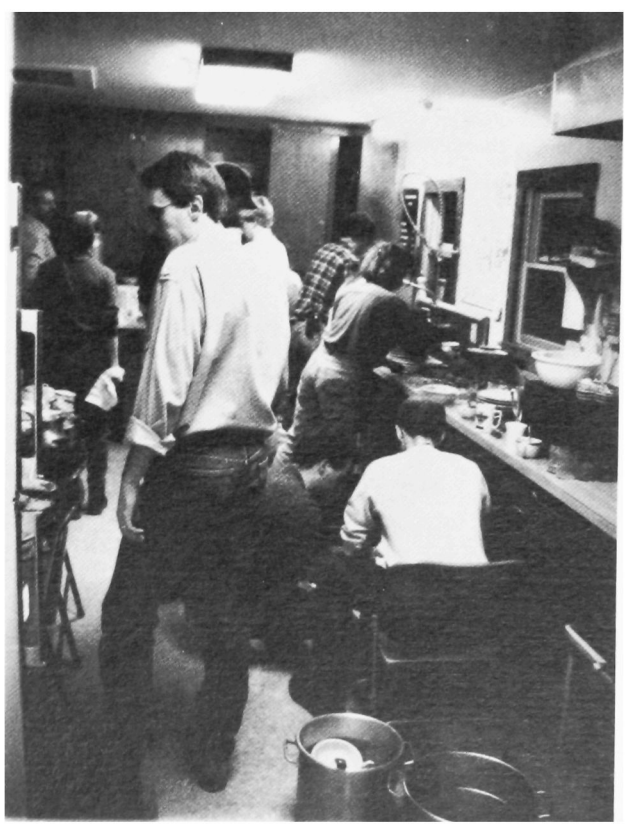
1991-92 greetings from the Student Chapter of the Wildlife Society!!! Again as in years past, the chapter has presented itself as an organization for the student who has an interest or career goal in the field of wildlife management, natural resources, environmental conservation or the like.

The new school year started off with a speaking engagement from Mark Sweeney - Coordinator for the Sunkahzee National Wildlife Refuge - a wildlife refuge in Maine's own backyard. He discussed the refuges' committment and research plans and provided students with ample opportunities for volunteer work (this included topics for that WLM 410 Wildlife Populations Project we all know and love!!!). Mark McCullough from the Maine Department of Inland Fisheries and Wildlife spoke on Maine's Endangered Species Program and outlooks for the future. Mark also provided the artwork for the Chapter T-shirts that were an outstanding success thanks to Kim's efforts. On December 7th, the students prepared a Game Banquet "Extraordinaire" for the members of the Penobscot County Conservation Association - we wanted to give them just a little extra "thank you" for the scholarships they provide many of the students. Phil Sirois a Naturalist/Photographer from Portland gave a presentation on the Rwanda gorillas. January, saw a presentation from Chuck Allen of the Maine Warden Service and Coordinator of the Operation Game Thief program - we all enjoyed the fabulous stories. Gil is still hard at work with the Woodduck Project - getting many new people involved. The Wildlife Conclave will be held at Cornell this year - everyone is geared up to win the Quiz Bowl - students have penned themselves against the faculty for practice (and a little fun).

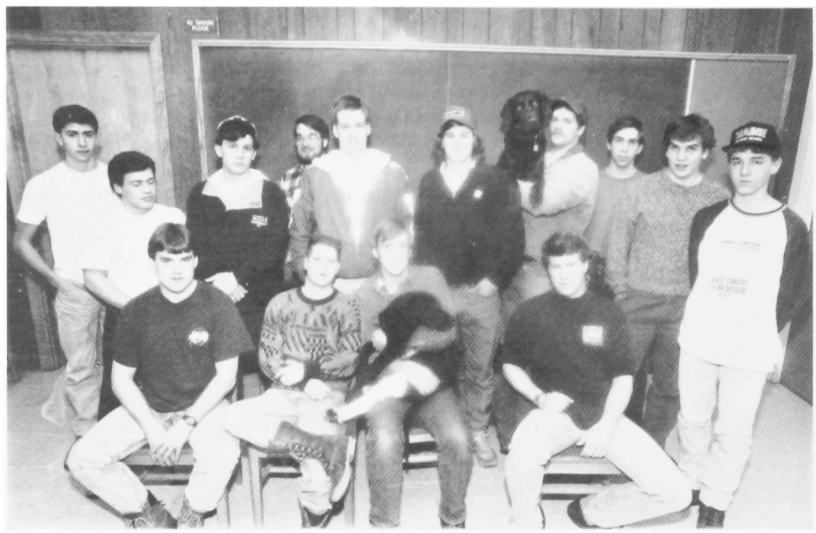
January also saw the transition of new student officers for the 92-93 school year. Kelly and Tim would like to extend their Thanks for a wonderful year of new experiences, faces (old and new) and memories to hold for a lifetime. The new officers include: Kris Higgins, President; Kim Hewitt, Vice-President, Justin Vreeland, Secretary, and Kristen Williamson, Treasurer. January also saw the transition to a new Faculty Advisor - Dr. Ray "Bucky" Owen - was passed the advisory cap. However, we will sadly miss Dr. Dan Harrison who has been the advisor for many years. Dan gave us all much patience, a lot of guidance, and a little independence to explore!!!

The Wildlife Society has envisioned goals of enriching the thinking of students in their course of study, allowing them to learn and grow, and striving to bring together a whole array of participants from the field.

THE GAME BANQUET



FOREST FIRE ATTACK TEAM



The Forest Fire Attack Team is a non-profit, student-run organization in the College of Forest Resources established in 1950, then called the "Hot Shots". The team consists of approximately 15 members and is trained as supplemental aide for wildfire suppression and management, working in close contact with the Maine Forest Service and the Orono Fire Department. The team is well outfitted with fire management equipment, including a brush truck with a water tank, and gas operated pumps. All members are trained in fire management and safety procedures.

Aside from managing wildfires, our responsibilities also include performing prescribed burns for the Orono Fire Department and other organizations. The purpose of these burns is to remove hazardous fuel under controlled conditions. The burns are usually conducted on grassy fields or brush piles. Prescribed burning provides valuable field experience for the team and is a public service for the community. These burns also raise a substantial amount of the team's funds.

Much improvement has been made to the brush truck in the last year. The truck is an impressive fire-suppression tool and a great source of pride for team members. The Forest Fire Attack Team welcomes any interested students to come and see what we're all about. It's interesting, it's extracurricular, and it's fun.

Is Time Running Out For Our Forests?

The future of the nation's forests is an important concern. Forests produce wood and paper. They provide habitat for wildlife. They add oxygen to the air. They're essential for soil and water quality.

Boise Cascade's foresters care for more than 660,000 acres of forests in northern New England. By nurturing trees from seedlings through their life cycle, we are making sure New England's forests will always be here.

Our nation needs forests for their own sake, as well as the wood they produce. At Boise Cascade we are working to provide both. For more information call 1-207-364-4521 ext. 2819.

Helping To Manage The Future of New England's Forests.

—with help from tree people . . .
Congratulations, Class of '92

Champion
TIMBERLANDS

Get better control of brush for better control of profits.

Accord® and Roundup® herbicides by Monsanto are valuable management tools for both site prep and conifer release applications. Accord and Roundup penetrate the leaves of susceptible plants, spread through the entire plant, and interrupt the synthesis of essential proteins – killing the plant, roots and all. As a result, you get long-lasting control of a broad range of herbs, shrubs and deciduous trees. Seedlings and young conifers are free to grow.

Free of competition, conifers can utilize more available light, moisture, and nutrients. More conifers are able to survive and grow into harvestable trees. Released conifers grow taller with greater stem diameters. Whether you use Accord or Roundup for site prep or conifer release, you can count on greater yielding timber stands for additional lumber and pulp per acre.

Use with Confidence. With Accord and Roundup you can get effective herb and brush control and minimize adverse effects on the environment. One reason is because Accord and Roundup do not leach in soil. They are non-volatile and have no residual soil activity. After application, they biodegrade into natural products. Furthermore, they will not bioaccumulate in the food chain.

Find out how Accord and Roundup can help you achieve the desired profits by controlling undesirable vegetation. Write Monsanto Agricultural Company, 14 Winterhaven Drive, Orono, Maine 04473-1118.

ALWAYS READ AND FOLLOW LABEL DIRECTIONS FOR ACCORD AND ROUNDUP HERBICIDES.

accord® HERBICIDE by Monsanto

Roundup® Herbicide by Monsanto

*Suggested retail price, 30 gallon drums

Accord and Roundup are registered products of Monsanto Company.

Hammond Lumber Company

We'll go the extra mile.

It's your timber that's supposed to be sky high. Not your loan payments.

At Farm Credit, we've been lending to the timber industry for decades. We understand the growing cycles and financing needs of timber owners and jobbers like you.

Our flexible repayment terms allow you to plan according to your current and projected financial picture. So you can hold onto your money when you know your cash flow will be low and pay when revenue is coming in.

When you're ready to purchase timber property, equipment, vehicles or mills, Farm Credit can help with our flexible terms – or even an equipment lease. For more information, call the Farm Credit office in Auburn, Maine, at 207-784-0193 or Newport, Maine, at 207-368-4333.

Without the assistance of the following people, ***The Maine Forester*** tradition would not have continued:

University of Maine Alumni Association
University of Maine Student Government
Student Advisory Committee to the Dean of College of Forest Resources
Louis Morin
Richard Hale
Harry Dwyer
Cindy Paschal
Lisa Lyons
Gina Pelletier
Brenda Astbury
Jonathan Lindberg
Tim Foster
Chris Murdoch
Rob Vodra
Keith Grabner
Nancy Craig
Sara Dooling
Krisha Costello
Eric Richmond
Dan Gilmore
Woodsmens Team
Forest Fire Attack Team
Society of American Foresters
Wildlife Society
Xi Sigma Pi
Forest Products Research Society

LETTER FROM THE EDITOR

It's hard to believe. Both Keri and I began the year with practically no idea how we were going to create ***The 1991-1992 Maine Forester.*** Throughout the year, with the assistance of the above mentioned groups and individuals, we received the support (financial and morale) we needed. Needless to say, finances were extremely short this year due to economic problems being experienced throughout the region.

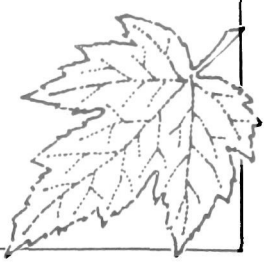
Words cannot express the thanks and appreciation we feel for everyone involved in this project. We commend our staff for their dedication and hard work. You did a great job and we hope you'll continue ***The Maine Forester*** tradition next year.

We feel that the students, faculty, alumni and staff of the College of Forest Resources have been well represented and that the identity which our College possesses within the University community remains strong.

A Special Note from a Graduating Co-Editor

I would like to wish my co-editor, Neil, the best of luck with next year's ***Maine Forester.*** Your dedication, spirit, personality, and caring attitude will certainly be reflected in next year's publication. To you, and the staff, I would like to wish the best of luck in your college careers and to acknowledge that it was enjoyable working with you all. Best wishes - Keri.

Congratulations and good luck to all graduates of the Collge of Forest Resources.

Co-Editors - Neil Brackley
Keri Yankus


The United States is extremely fortunate. Our forestlands are blessed by fertile, temperate zone soils, and long growing seasons. We are also experts in the science and practice of forestry, and have the most sensitive and comprehensive environmental laws and controls in the world. America's forests are capable of being managed on a sustained basis using a body of knowledge that far exceeds the level of silvicultural skill available in most other parts of the world.
