Looking for a club where you can travel, meet interesting people, and be able to take your frustrations out? Well, the Woodsmen Team is the place. This club is open to male and female. We travel to places such as Montreal, Nova Scotia, and Finger Lakes-New York. There is always lots of time for talking to other teams and discussing things like Canadian Forestry Practices, ways of practicing, and school or work in general. As far as taking frustrations out there is no better way than sinking an axe in a log or sawing through a piece of wood as fast as physically possible. So, come on down to the stump dump and join in the fun and excitement, while releasing some of the pressure from college.
The Forest Fire Attack Team (FFAT) has come off of another strong year with increased interest and support. We continue to be one of the largest and most active groups in the College.

Our building has come along well with the addition of electricity, woodstove and a brand new propane heater. We were fortunate to acquire a 1966 International Fire truck with the help of Dr. Brann and Louis Morin. It has a 750gpm pump with a 750 gallon tank. The 4x4 is near completion. It should prove to be an excellent brush truck, becoming the main workhorse for the Team.

The Team is acquiring an ever increasing amount of recognition and respect with surrounding towns, especially Orono who is now paging us for fires. At present, we have a two-way radio with Orono and State Fire frequencies, and we hope to obtain another one soon.

Each year brings us more and more areas to be burned. This spring is expected to continue in this fashion.

Training is taking place on a continuing basis, primarily with Gerry Parsons of the Maine Forest Service (Green Card) and Al Kimball in his Wildland Fire Management class.

At this time we'd like to thank our advisors, Al Kimball and Tom Brann, as well as Louis Morin for their continued support.
The Society of American Foresters is the professional society for forestry and related fields. The Student Chapter bridges the gap between the profession and those who aspire to it. Yearly activities include field trips, speakers, attending forestry meetings and sponsoring educational and public service events. Students are encouraged to join the national chapter (required membership dues). National members receive the Journal of Forestry, a monthly publication that features articles, research papers and news from, and for, foresters.

The Student Chapter has enjoyed a renewed interest in 1987-1988. Attendance at the meetings is up compared to previous years and participation in activities is growing.

Ten students were able to attend the Common Ground Country Fair in Windsor, ME in September. The chapter sponsors an informational booth at the fair every year. This is an opportunity for members to meet and talk with the public. Other activities have included a job seminar and a lecture/discussion with MAINE TIMES reporter Phyllis Austin. A number of students will be attending the New England SAF regional meeting in Lowell, MA in March. A hike is scheduled in April to do maintenance on the Appalachian Trail between Gulf Hagas and White Cap Mountain.

We hope that the growth trend increases as students learn more about the importance of being a professional. We are encouraged by those who are getting involved and hope they will work to mold the chapter to meet their needs in the future. To those who are not involved in the Society or in any of the other activities in Nutting Hall, we ask: Are you an aspiring professional?
UNIVERSITY ENVIRONMENTAL INTERPRETERS
YEARBOOK ENTRY.

The University Environmental Interpreters is a student organization that exists to promote experience and education in students. The club is sponsored by the Parks, Recreation and Tourism program but draws membership from a variety of majors.

Some of our activities include sponsoring informative programs that are attended not only by the University but members of the surrounding community. This experience gives students practice in oral communication that is applicable to the professional world. The club also serves as a social function and in the past our activities have included hikes, trips and cookouts.

ENVIRONMENTAL AWARENESS COMMITTEE SPRING 1988

During the 1987-88 school year the E.A.C. has been involved with various activities dealing with the community and the university.

Numerous clubs, elementary and high school groups were toured through the university's forest by the E. A. C. under the direction of The Maine Chapter of The Audubon Society. Because of our involvement with the program our members received many letters of thanks for our concerned effort.

We were also involved with the Maine Caribou Project. Our goal was to allow people the chance to learn about one part of Maine's Heritage and to stress the importance of public donations to the success of the project. These tours also gave us the chance to "show-off" our facilities. The moose, deer and the eagles also provided an excellent experience for those who participated in the tours.

This season has been a successful one. Our members are busy like any other college student but we still have time to provide an educational program. Our recent combination with the Student Chapter of the Wildlife Society promises and even better program in the future.
In 1947 the Forest Products Research Society was founded. It is an international, non-profit association that promotes and advocates new technology in the forest products industry. FPRS provides a means for which industry and research can stay in contact with one another through publication of the latest information. Here at the University of Maine a student chapter helps to bridge the gap between students and industry. Students not only can become a member of the student organization, but with the national one as well. Membership includes reduced rates to seminars and conferences and subscription to the Forest Products Journal. Also included is the exposure to job opportunities in the journal and periodic newsletters, a membership directory that has more than 3,500 names of professionals in the industry.

The student group holds meetings on a monthly basis. They are conducted by a chairperson, vice chairperson, treasurer, and secretary with an advisor to contribute whenever necessary. Discussion at the meetings involves everyone with activities and events always being planned. Some activities include mill tours, informative films, and guest speakers. For example, in the past FPRS has gone to Louisiana Pacific (Waferboard plant), and Pinkham Lumber both of which are located in northern Maine. Also, speakers have included faculty and representatives from companies in the industry. Above and beyond this, one can improve his/her interpersonal skills, meet new students, faculty and people from the industry, and be part of a professional society.

Chairperson - Dave Hall
Greg Frohn
Advisor - Barry Goodell
Vice Chairperson -
Bill Winchester
Secretary - Chuck Gaura

The student chapter of the Wildlife Society is a professional organization offering students an opportunity to learn about and become involved in the area of wildlife management. This organization is not limited strictly to wildlife majors; all interested students are encouraged to participate. The student chapter sponsors monthly speakers on wildlife related issues which in this past year have included the Maine Department of Inland Fisheries and Wildlife Bear Project, black ducks, and subsistence harvest by the Penobscot Nation. A newly initiated project this year is a wood duck project. This is a long term project offering members the opportunity to gain practical field experience through the maintenance and monitoring of the wood duck boxes at Hirundo Wildlife Refuge. Other activities include field trips, the annual game banquet, help with the Penobscot County Sportsmen’s Show, and help with the admissions office phonathon to prospective wildlife students. This spring the chapter will be sending a team of wildlifers to the Student Conclave in Syracuse, New York to compete in a quiz bowl and other wildlife related events.

The student chapter is organized this year by president Dave McLain, vice-president Lisa Comly, treasurer Gerry Hayes, and secretary Lucy Newton. Many members chair the various committees and there are always plenty of opportunities for interested students to become involved.

Lisa M. Comly
Vice President
Xi Sigma Pi is the National Forestry Honor Society. It recognizes students who achieve in academics and in the forestry profession. Two of our on-going services include free tutoring and an open exam file.

This year the members and initiates got off to a good start with the Christmas tree sale. It was one of our best years yet! We would like to thank all the people who volunteered their time to help us make the sale a success.

While we were busy with the sale, we were also planning the Christmas party for the children of the faculty, staff, and students of the College. Bart the eagle made a visit (thanks to Steve McCoy). As one of our craft activities, we had the children make ornaments, which consisted of gluing glitter on pine cones. (However, it seems that Chris Martin and the kids got more glue and glitter on themselves than on the cones). In addition, there was a pinata for the kids and of course Santa made a brief stop on his way down from the North Pole. For those kids (and grown-ups) who were missing their favorite Christmas shows, we played a video tape of the best-loved Christmas specials.

In the spring, we coordinate and sponsor the awards banquet. Money received from the tree sale goes towards scholarships. Our last activity of the year is the graduation reception for all of the students of the College of Forest Resources.
1986-1987 SCHOLARSHIPS AND AWARDS

FOREST PRODUCTS RESEARCH SOCIETY AWARDS
  Andrew R. Sheere
  Kamarulzaman Nordin

NEW ENGLAND KILN DRYING ASSOCIATION AWARD
  Thomas F. Breen

WILDLIFE SOCIETY AWARD
  Andrew P. Weik

ROLAND A. STRUCHTEMeyer AWARDS IN FOREST SOILS
  Deborah E. Soule

DISTINGUISHED STUDENT SERVICE AWARDS
  Jason A. Barker  Gerri Bosse  Glenn P. Nadebu
  David P. Kenney  Samantha Langley  Paul R. Nichols

Woodland managed under the Tree Farm Program will be of value forever.
It's interesting to speculate on kerfless laser sawing. It will probably be a spin-off of "Star Wars" in the future, if ever. But it's not available yet.

What is available right now is the McDonough thin kerf Air Strain Band sawing machine. These husky machines come as close to kerfless laser sawing as you'll find.

McDonough Band machines use a special type of air strain that translates Top Wheel over-run into increased strain. Saw strains automatically increase as cutting loads become greater.

McDonough Band machines are extra heavy. We don't permit vibration because vibration becomes increased kerf. This is also the reason McDonough uses cored wheel balance pockets to achieve perfect wheel balance to eliminate vibration.

McDonough Band machines use Cartridge Type Pressure Guides so saws are always in proper position for thin kerf sawing.

McDonough Band machines exploit all of the capability and capacity of the band saw blades. They work extra well with Stellite tipped saws.

While you're waiting for kerfless laser sawing, convert your inserted tooth circle saws to McDonough Bands and save two of the three boards you're now losing to sawdust. If you do this, you're two-thirds of the way to kerfless sawing and you can do that now.

Your added profit through kerf saving may be enough to buy a kerfless laser machine some day—who knows?

STUDENT

GOVERNMENT

The Student Government is working for you!

Some forestry basics cannot be bought.

The basics you'll use in your forestry career cannot be bought. They were given to you—your hands, your eyes, your mind.

You develop these basics through education and experience. And you supplement them with man-made tools.

That's where Forestry Suppliers, Inc. fits in. The tools we sell make it easier for you to develop the basics you were given.

Team up your basics with our tools for your success.

Forestry Suppliers, Inc.
And Linda Lakeman, Cory Madore, Carrie Knowlton and all the other first-graders who have already fallen in love with the Maine wilderness. We’re making sure Great Northern’s forest will still be flourishing when they grow up... right around the turn of the 21st century.

We’re creating the forest of the future with scientific management practices. By selective use of herbicides and supplementing natural regrowth with nursery-grown seedlings, we’re making our woodlands stronger than ever.

Our 21st century forest will be far more productive than ever before. But still just as beautiful as a six-year-old’s imagination.
It's the best raw material in the East. Pinkham Lumber selects the finest Eastern spruce-balsam fir and pine from the woodlands of Great Northern Paper - two million acres of trees in all.

From quality trees comes quality lumber. Kiln dried, graded and weatherproof wrapped, each shipment is produced by people who take pride in their work.

Look for the twin bear symbol and the Pinkham name. They're your assurance of consistent quality, start to finish. We guarantee it.

FORESTRY RULES
LETTER FROM THE EDITOR

The first Maine Forester was published in 1923. This edition marks the 65th anniversary of this publication. Over the years there have been gaps in which the book has not gone to press. However, it was never forgotten nor forsaken. Year after year a group of students and faculty has come together and volunteered their time and talents to bring the tradition to life. This year we have tried to explore the elusive reality of professionalism. In a recent conversation with David Field, this year’s dedication recipient, he identified one word that is the essence of being a professional, volunteering. This book is built by volunteers. Their contributions of time, ideas, money, resources and talent make it possible to bring these pages to you. However, the volunteers’ efforts do more than just produce a book. Those who give freely of themselves provide the strength, the vision and the hope for a better society. As our world grows in size and technology, each individual must expand their capacity to reach out to their neighbors and extend a helping hand! Whether you work on the yearbook, rake your neighbor’s lawn or participate in the town government, you must get involved.

There are many people who have made this edition possible. The creation of a yearbook is truly a joint collaboration of many individuals, organizations and businesses. I would like to start by thanking our contributors and advertisers, the College and Student Government, whose generous support has enabled this project to come to life. My congratulations and thanks go to the many fine articles, stories and artwork that have been contributed this year. Special thanks to Mary Jo Lavin, Charles Gresham, Linda Alverson, Michelle Yade-Benoit, Erich Stefanovich and Pete Caron. I would like to give special recognition to our printer, L. H. Thompson of Brewer. Tom Smith and his crew have been exceptionally patient and helpful with all the little details. Their efforts and expertise helped produce last year’s award winning edition and we hope for the same this year. And, once again, thanks to Louis Morin for showing us the way.

Lastly I would like to thank the 1988 staff. This edition is dedicated to a professional who challenges the students to excel. It belongs to a group of professionals who have met that challenge. Everyone has been indispensable, but there are three guys I feel deserve special attention. First, the SENIOR, Dave Fournier, the only 1988 graduate on the staff. And secondly, the FRESHMEN, Ted Gamron and Dan Long, who did not know what they were getting themselves into but certainly know what to look forward to next year. Thanks to my successor, my assistant, and my chief recruiter, Cindy. I only had to get Cindy involved and she got everybody else. Thanks to Sarah for being quiet and dependable throughout. Last and most important, thanks to those who jumped on the bandwagon towards the end and helped push us over the top, Michelle, Bill and Bill, Kristie and Merrick and Pete. I know that I am forgetting somebody but the important thing is that who ever that person(s) is, they know what they have done and why it makes a difference.
