FOGLER LIBRARY  
MAY 12, 5 PM  
IN-PERSON AND ON ZOOM

Artificial Intelligence is rapidly transforming the business world. From automation to marketing, AI tools offer powerful opportunities—but also raise critical questions.

How should businesses use AI responsibly? What are the real benefits, and where do the risks lie?

Join us for a panel discussion exploring the impact of AI on business practices, ethics, and innovation

Panelists include:

- Dr. Jason Harkins, Dean, Maine Business School and Dean of the Graduate School of Business at the University of Maine
- Dan Reed, SCORE Business Mentoring Program
- Dr. Berkeley Almand-Hunter, Technical Director, Northeastern University's Roux Institute

Open to all. Ideal for students, entrepreneurs, and professionals interested in how emerging technologies are shaping the future of work.
